Hello Gwen,

After looking at the statement of work and associated guidance documents for conducting RI/FS activities at sites, one document that you may want to include is Ohio EPA's Technical Guidance Manual for Hydrogeologic Investigations and Ground Water Monitoring, February 1995.

It covers topics such as characterization of site hydrogeology, well and aquifer hydraulics, drilling and sampling, well design and installation, well development, well abandonment. Just the usual investigation techniques that are involved at sites where wells are needed and or to be abandoned.

Call me if there are questions.

Thanks,
L. Antonelli
